

Plan

1. Check to see if start starts the game
2. Check to see if it displays the right person who won
3. Make sure the computer plays after every time you play
4. Make sure the box is displaying the right X or O for who placed it

Test Postconditions

1. Works correctly
2. If the user wins it displays that they lost
3. Sometimes the computer doesn't play and then the user gets to play again
4. Sometimes the middle left box switches to O even if you had an X there
